BRING THE BEAUTY OF NATURE INTO YOUR HOME

WITH LUXURY STONEWARE BY EDENSTONE

WHO WE ARE

EdenStone is a designer range of handcrafted stone composite bathware created from reclaimed quartz, marble and granite. Be inspired by our pieces and transform your bathroom ideas into your own Eden sanctuary. Our designs are sleek and on trend with modern shapes suiting the contemporary home. Featuring a distinct earthly feel with a subtle Terrazzo fleck throughout the finish, our baths and basins are as unique as you are. No bathroom is complete without a decadent bath to unwind in. You are spoilt for choice with EdenStone.

Already with a variety of styles, sizes and colours, we also custom create basins or baths to fit every design project. So, if what we have still doesn't match your imagination, get in touch and let's work together to create it. Let that dream bathroom become a reality and indulge yourself with a luxurious bathware addition from EdenStone.

Exceptionally strong

We use the strongest composite stone on the market. Resistant to scratching, stains and abrasion but can be easily repaired if accidentally chipped.

Light weight

Easier to handle, as they only weigh 130kg on average and can be used for multi-level properties.

Eco-friendly

EdenStone bathware is created using reclaimed crushed quartz, marble and granite.

Natural beauty

Natural stone fleck appearance in Ivory White, Dapple Grey and Onyx Black in semi-gloss.

Easy installation

Perfect for renovations as most of our bath tubs fit through existing doorways and also have a plumbers space for an easier install, saving time and money in floor preparation and installation costs.

Totally customisable

Sizes for all bathrooms and outdoor projects. We can craft our work to your requirements.

Quality assurance

2 year manufacture warranty.

Clean and hygienic

Non-porous material ensures an easy to clean surface that is also resistant to micro-organisms and bacterial growth.

Warm to the touch

Due to its high heat retention properties and a thermal cavity, your bathtub will heat up quickly and remain warm for longer. These practical 'green' environmental and energy-saving features contribute to an already eco-sensitive tub.

Hand-crafted

Luxury can not be mass produced. Each piece of EdenStone bathware is a 100% hand sculptured work of art which has undergone hundreds of hours of creation achieving a smooth and refined look that is elegant and sophisticated.

Each unique piece will have slight variations which ensures absolute individuality, making it special and just for you. The handcrafted imperfections (10% is considered normal) is what makes our work unique and memorable.

AUGMENTED REALITY

BY

eden
STONE

WHAT IS IT?

By definition, Augmented Reality is 'the rendering of digital images or data onto real-world objects'. At EdenStone, we wanted to give our customer's an unparalleled experience and the ability to browse our products in a new and exciting way.

Through research and development we have designed an Augmented Reality tool that allows you to place any of our baths or basins in your room and scale to size. This changes the game and is perfect for deciding where to put your bath or basin and which style will suit the shape of your room best.

HOW DOES IT WORK?

Simply hover your phone camera over any of the QR codes in this catalogue.

This will take you straight to the webpage where you can begin.

Scroll down the page until you see this box  - The phone will prompt you to start moving and 'scanning' the area in which you want to place the bath. Once scanned, the bath will appear in your room.

You can then move your phone around and orientate the bath by using your fingers. You will be able to take screenshots and interact with your virtual bath.

BOULDER BATH

Size On application

Material Basalt – Volcanic stone known for its heat retention

Get back to nature with the rustic elegance that is created purely from mother nature herself. These stone tubs will stand the test of time in any weather and are the height of luxury. Once filled you can relax, indulge and know that no one in the world has a tub as unique as yours – you will never want to leave and with the thermal mass of stone retaining the heat for up to hours, there is certainly no hurry to!

BT-CU

CUSTOM BATH

Size As required

Material Composite stone,
Pure Marble or Boulder rock.

Don't see a bath that fits your vision? Create a custom one!

Each space is unique, so your bath should be too! For the people who have a clear idea in their head of the bath they'd love, this is the perfect fit for you!

Simply draw up your design idea, get in touch and we will discuss how we can bring your vision to life.

We ensure that the process is collaborative, so you will be informed and given the opportunity to give feedback at every stage.

As these are custom builds, the turnaround time is roughly 16 weeks compared to next day for a pre-designed solution.

HANDCRAFTED

EdenStone composite bathware is eco-friendly as it is created from reclaimed crushed quartz/marble/granite ensuring we are all contributing to looking after our earth.

Every bath and every basin are 100% handmade making them unique works of sculptured art. Our team of craftsmen and women will devote hundreds of hours lovingly, creating your remarkable masterpiece. Due to the nature of such handmade creation, no two baths or basins will ever be the same making each piece special in its own right. Each will have slight colour variations with minor differences which ensures absolute individuality. These slight variations are a characteristic of our baths and basins and this makes each piece special and just for you.

This variation may look slightly different to photos seen on our website and in this catalogue. Our baths are guaranteed using only the finest materials and with so many options available, every bathroom can have its very own piece of Eden luxury.

BATHCARE

EdenStone tubs and basins are low maintenance and easy care. A wipe with a soft cloth is best for every day care or use a general bathroom cleaner for more aggressive stains.

OUR MATERIALS

Marble is a metamorphic rock which forms at convergent plate boundaries where large areas of the Earth's crust are exposed to hot magma. It can be found in the mountainous regions of many countries of the world. India, China, Italy, Turkey, Indonesia and Spain represent the majority of marble utilised worldwide.

Quartz is the second most abundant mineral in the earth's continental crust, behind feldspar. Quartz is a mineral compound which is extraordinarily hard and resilient (greater than glass or most metals). It is an excellent surface for kitchen benchtops and bathrooms due to its durability.

Granite is an igneous rock that is granular and phaneritic in texture. Granite is predominantly white, pink, or grey in colour, depending on mineralogy which is the result of hundreds of millions of years of creation. As far back as the Ancient Egyptians, granite has been harvested and used in a variety of structures, including pyramids in Egypt. It is among the hardest of natural stones and is used for many applications due to its high compressive strength and durability.
